
Alejandro Vinokur

Backend Software Engineer | Backend Development, APIs & Integrations

Buenos Aires, Argentina (UTC-3) | alevinokur@gmail.com | linkedin.com/in/alejandro-vinokur-758596165 | github.com/AleVinokur

PROFESSIONAL SUMMARY

Backend software engineer with 3+ years of experience across backend and full-stack delivery. Recent work at Avature includes a launch-critical Zoom SDK/Amazon S3 recording workflow and a provider-configuration refactor used by approximately 78 consumer files, with additional experience in production diagnosis and mentoring. Core skills include PHP, Laravel, Symfony, REST/SOAP APIs, SQL, Docker, and AWS.

EXPERIENCE

Software Engineer | Avature

Jan 2026 - Present | Remote

- Built an asynchronous backend workflow with Zoom SDK and Amazon S3 to retrieve and make recordings available in Avature, unlocking a required capability for a new embedded video solution.
- Designed and implemented an architectural refactor of a provider-configuration component used by approximately 78 consumer files, replacing a 434-line shared component with focused interfaces and provider-specific responsibilities to reduce cross-module coupling.
- Resolved a silent data-migration failure end to end through Kibana and SQL: diagnosed the root cause, validated the fix with production-like data, verified the rollout across instances, and documented preventive actions in a post-mortem.
- Collaborate with QA, Product, implementers, and other engineers across video and provider workflows.

Backend Developer | IT ROCK

Jul 2023 - Jan 2026 | Hybrid

- Focused primarily on backend development throughout the role.
- Implemented monolithic Laravel views and email templates and collaborated with UX/UI when delivery required full-stack work.
- Mentored and supported new developers through onboarding, code reviews, technical feedback, and ongoing guidance.

Helpdesk Agent | CleverSoft

Nov 2022 - Jul 2023

- Troubleshoot user, application, and systems issues and supported client environments through remote Windows and Ubuntu/Linux server connections.
- Built internal dashboards for the Helpdesk team and created FAQs and technical documentation from recurring support needs.

TECHNICAL SKILLS

Backend: PHP, Laravel, Symfony, Node.js, REST, SOAP

Integrations: Zoom SDK, third-party APIs, event-driven workflows, asynchronous processing, background tasks

Data: SQL, MySQL, PostgreSQL, MongoDB, JSON migrations, ETL

Runtime & cloud: Docker, Linux, AWS S3, AWS RDS, CloudWatch

Quality & reliability: TDD, PHPUnit, Selenium, ELK, Kibana, root-cause analysis, post-mortems

Design: SOLID, dependency injection, interface segregation, incremental refactoring

EDUCATION

- University of Buenos Aires - Systems Engineering coursework, started Mar 2023 (currently paused)

LANGUAGES

- Spanish - Native
- English - B2 Upper-Intermediate; technical reading, writing, code review, and training
